Synopsis

For those parents and students who thought college was unaffordable there is a remedy, yes even free college courses! Not only will passing a CLEP exam get you out of a course you will also get the college credits on your transcripts. Even more astounding the tests only require a 50% score. XAMonline full study guides will give you 100% confidence. CLEP has been around for twenty years and is the most popular credit by examination program. The CLEP program has 33 unique tests but among those CLEP College Composition is the favorite. You should already have taken high school English as a senior in high school. Your training should have included writing essays, and had exposure to writing skills which include revision and the ability to use resources as source material. The XAMonline provides the perfect fit of content which covers the following: Molecular and cellular biology, Organismal biology, and population biology. Since there are three credits on the line you will want to invest your time in reviewing for the test, not only because you want to pass the test but because CLEP Biology is a foundational course upon which all life sciences expand. If you took AP or SAT Biology and did not get the credits this is a great fall back plan. Sample test experience Time management is one goal of test prep. Get acquainted with the directions and the format. The XAMonline sample test experience will expose you to each question type, and cover the range of topics.

Customer Reviews

Granddaughter is still studying so we don’t know how effective it will be but she likes the format of the book.

It is what it needs to be ...

My daughter studied this in addition to Apologia Biology. She created and memorized over 1000 flashcards from this material. She received an 85% or better on all 5 practice tests she took (2 in this book, 2 online, and the one in the Official CLEP guide). Then, she barely passed the CLEP with a 56 it was VERY stressful and difficult. In our opinion, even if you memorized the entire book, it would be inadequate to do well on the CLEP. She found that her Apologia helped her more often than the material from this book and it was woefully inadequate in the human biology section. There was a large percentage of questions about human bio that were not addressed in either book, but we were counting on this one to provide at least the minimum in every subject area. The genetics section is also lacking (i.e. electrophoresis is not included).
