Graber And Wilbur's Family Medicine Examination And Board Review, Fourth Edition (Family Practice Examination And Board Review)

Synopsis

The #1 review book for the Family Medicine Board Examination is now updated with a new full-color design! The renowned Family Practice Examination and Board Review is now Graber and Wilbur's Family Medicine Examination & Board Review, the perfect way to prepare for the primary and recertification exam in family medicine and for licensure exams. This engagingly written study guide has been completely updated with a new full-color design and is enhanced by powerful new learning aids, including 50 additional questions to the already comprehensive final exam, and chapter-ending clinical pearls that consolidate high-yield information. You will also, of course, find the humor, wit, and approachable tone that have brought the book legions of enthusiastic and appreciative fans. New to this edition! Full color layout Clinical pearls at the end of each chapter to highlight key takeaways 50 brand new final exam questions Numbered cases for easy reference Outstanding features from the previous edition: More than 350 progressive case studies that reflect the realities of clinical practice and prepare you for your exams 29 chapters based on body system and elements of patient care A comprehensive final exam (nearly 200 questions) with answers referenced to pages in the book Detailed answer explanations that describe not only why an answer is correct, but why the other answers are wrong Comprehensive coverage of ALL topics on the boards and recertifying exam Super-effective learning aids such as Quick Quizzes, Helpful Tips, learning objectives, clinical pearls, and more Color photographs of conditions most easily diagnosed by appearance An outstanding refresher for primary care physicians, physician assistants, and nurse practitioners

I purchased this to aid studying for my family medicine boards. I purchased this in January of 2017, and went through it in 2 months, and kept track of anything I did not feel comfortable with and researched that more thoroughly on up to date. I also took 3 in-training exams and did 600+ questions in addition to this. I received my results and passed, and indeed did better than I did when I initially certified. I think that this book was quite thorough, and hit on a lot of highlights in family medicine and was quite useful for review. However, I would also supplement review with the in-training exams and previous board questions (which are available as an app) as well. I would say that reviewing the various societies' guidelines is also quite useful. Overall I am very glad I purchased this, as I can continue to have my certification and work. I would recommend it to anyone who wants to do a self study for review.

This is the second time I have used this book for my Board Review. My most recent Board test was after I had been working in a less-generalized practice for multiple years, so I was a little worried about knowing what I needed to know to pass the test. I used this book along with the AAFP Board Review course - 2 excellent sources. I passed with a comfortable cushion. This book was informative, funny, and I would definitely purchase it again.

Great review on a wide variety of topics. The humor alleviates some of the tension associated with board reviews. I prefer this over Swanson's and Mometrix which I've used in the past. 2 reasons I took away a star: 1. It was delivered the first week of October which is 3 months past the expected delivery date of mid-July 2. A lot of typos which is disappointing considering they had 3 extra months before delivering this edition.

Great - this is the BEST Fam Med Board review and general review text available. Nicely Done!

This book was so much fun for studying for boards. It has high quality information, walks you through cases in a way that kept my attention, and sprinkles just enough humor in there to keep you reading. For example, there was a question early on about Godzilla using smallpox to attack Tokyo and thus started a case on viral threats. I highly recommend this as a supplement to your studies. (P.s. I passed high with a 570. But this was not my ONLY study source)

Excellent Book. I've used this, Rosh Review and Bratton for Family Medicine Board Review Prep. I just took the boards and this by far did the best at preparing me for questions. It is easy to read and taught me several new things as well. I highly recommend.

The information is solid and well organized. However, the frequent continuous attempts at humor are unwelcome and distracting. Every second of my time is valuable. I purchased this book to study for the boards. I did not purchase this book to listen to someone attempt to be a comedian. I really wanted to give this a two or three rating, but the information is good and I realize some people will not be as annoyed by the attempts at humor as I was. At the time of my purchase, this was the most up-to-date book available. Therefore it was really the only option I had.

HIT THE TOPICS ON THE TEST!
