Leather Tooling And Carving

Synopsis

This book by a well-known handicrafts instructor will teach you the fine art of leather tooling and carving so that you will now be able to make the handsomely crafted leather of handbags, belts, watchbands, and billfolds you have often admired. You will find that custom-crafted leather items are not only easier to make than you may have expected but also offer quite an enjoyable hobby. Many books deal with leatherwork in general but this book is one of the few that concentrate on tooling and carving. The author first introduces the various types of leather and tools, giving complete information on how to identify the superior sections of a hide and how to decide on which kind of leather is best for your purpose: kidskin for gloves, steerhide for billfolds, etc. Twenty-six different leather tools are depicted along with an illustration of the impressions the different kinds of stamping tools make. After this necessary background, the author covers the basic processes of leather crafting from start to finish: cutting and preparing the leather, transferring the design, tooling, carving, lacing, cleaning, dyeing, and finishing. This section is profusely illustrated with line drawings and photographs to make each step easy to master. You are now ready to begin the special projects, for which complete instructions and patterns are provided: bookmarks, key cases, coin purses, watchbands, billfolds, belts, shaving kits, camera bags, handbags, and cowboy accessories are just a few of the things you will be able to make. Hand-tooled leather items are quite expensive on the market, but you will find yourself with substantial savings when you make them yourself. What is more important, however, is that leather tooling and carving is an enjoyable craft that anyone can become adept at and this book will provide you with all you need to do just that.

Book Information

Paperback: 128 pages

Publisher: Dover Publications; Revised ed. edition (June 1, 1974)

Customer Reviews

Upon receiving the book, I was NOT too impressed. Although the book had some good "tid-bits" of information, it did not stand-up to it's title. (TOOLING & CARVING). About 1/5th of the book covered "tooling & carving" VERY LIGHTLY, and the rest were leather-working projects. As a matter of fact, keep in mind that this books copyright date is 1950 - so you can guess at some of the projects. But it is a decent book, and does cover some of the topics "lightly". I wish I could find something else to help me raise it to a rating of THREE STARS...but I can't. But as a helpful hint, you cannot go wrong with any of the "Al Stohlman" leather-working books. (Look for these, invest in these, be pleased with these). So to end, it's an OK book, but you can invest in a better product. Support your local leather-craft distributers, as they should carry the above mentioned books. (Hey...I bet .com may carries one or two of "Al's" books).

very informative

Great !

I have recently started doing leather work and find this book very useful with some good ideas and helpful information.

This book is well written and very informational. If you want to learn leather tooling and carving this is the book to start. with. Leather Tooling and Carving

I got this book for my husband and it helped him get familiar with his new hobby. He liked it very well.

Excellent

This is a good book of project and design ideas for those still mastering the skills of leathercraft, as well as, the accomplished leather worker looking for different ideas. Projects are on a basic to intermediate level of accomplishment.
