The mercury dimes with the winged messenger god, Mercury, (the planet's namesake, for its speedy journey around the sun) is a beautiful design that matches in style and grace the two turn of the century ladies on our quarter and half-dollar coins from the early teens of the 20th century. These coins are highly collectible and are celebrating a century of numismatic history. David Bowers is the expert in coin collecting and his remarks are treasures. Each of the Guide Books belongs in any serious collectors library.

A must have for all serious coin collectors of coins from the first half of the 20th century

Couldn't live without this book.

Wonderful book that gives me all the information that I need to start my new collection. This book tells you what to look for in each coin for the year and mint mark. I've been using it and buying my coins with confidence!

Excellent numismatic history and reference for any collector. Specific details about individual coins/dates/mints are very informative.

Unless you have no other books that contain general US minting history, the better value is to purchase "A Guide Book of United States Coins Deluxe Edition". The details on the noted series of coins is the same.

Great history and background, not only of the coins but what else was going on at that time in history. Great detail on the varieties and strategies for anyone interested in building a collection.

Recommend all the red books, they are great sources of info.
