Customer Reviews

Brenda Roscher was diagnosed with Crohn's disease in 2001. A graduate of the State University of New York at Oswego and Jefferson Community College, she has worked in the restaurant industry for twenty-five years as a cook and restaurant manager. She lives near Myrtle Beach, South Carolina.

If you have Crohn's, like me, you can buy this book. If you don't have Crohn's, you can buy this

book. Since Crohn's reacts differently for each individual it's hard to say whether you'll benefit from this book, or not. In reviewing the recipes I find that a lot of them are meals I've already prepared and ingest regularly. However, as with any cook book you will find new ideas to try out. Having knowledge of what makes you flare up can help you avoid some of the ingredients - there's no magic, here, but, it's a good book. It's written in plain language and starts with the story of how the author was diagnosed with Crohn's - with humor included.

The introduction is what I liked most about this book. What I was disappointed in was the content. My grandson (9 years old) was recently diagnosed with Crohns Disease. I was looking for a cookbook that would guide me and his family through the process of what we can fix for him to eat. The recipes are definitely not geared toward those who are new to the disease. There are just too many ingredients that my grandson is not allowed at this point. All in all, it's just a regular cookbook to me which is an opinion shared by my daughter-in-law after she read through it. I truly can't recommend it for a Crohns sufferer.

Excellent

This is the worst book I have ever seen to address these very serious digestive conditions. There is absolutely nothing special about the recipes or the information she offers. The recipes aren't even interesting or appealing let alone safe for people with IBD or IBS. All of the recipes contain ingredients that are KNOWN to aggravate Crohn's and colitis. As a physician and someone who struggles with these issues personally I find this book to be offensive to anyone who has done any research on how to help themselves. She should be ashamed for titling this book the way she did or for putting it out there in the first place. I wish I could get my money back, please do not waste yours! If I could give negative stars on the rating I would.

I love these recipes. Basic, easy and delicious. I have IBD. I am not afraid to leave the house after eating these recipes. I understand now about adequate nutrition and why I have more energy after following her guidelines. Thank you Brenda for the most helpful book.

My husband loves the mac n cheese recipe. Easy to read, well organized, and good recipes!

OK recipes. Unfortunately, many are not appropriate for Crohn's folks on low residue diets.

Lots of recipes that seem like they will be good, but I didn't really understand what was colitis-specific about them. I was also hoping for advice/recipes for recipes during flares, and I didn't see anything like that either.
