As a poor college student trying to make it to dental school, I was hesitant to buy this. However, it turned out to be the best 90\$ investment for the actual DAT. I bought the Princeton Review DAT study guide and this product, and it was very helpful. I actively studied about 2 weeks before the actual DAT exam (about 5-6 hours a day). Prior to those two weeks, I studied on and off during the college semester whenever I had the time and energy. I would say that the most helpful method to prepare before actually taking practice exams is to study hard during college. It makes it easier to study for the DAT. As for the product itself, I thought it was slightly confusing to use at first but all went well in the end. One thing to take into consideration is that it does EXPIRE after 7 months. The PAT section did have repeat questions in each of the 3 tests, and by the time I did the third test I could already see what the answer was. In addition, the answers need to be evaluated by looking at the answer sheet and comparing it to the answer that you chose - unlike the science and math section, it does not show you the right answer and explanation on the spot. Finally, the grading system was questionable. I repeatedly got a total score of 18 on each of the 3 exam (I also scored a 16 and 17 on the Princeton Review exam, which I also thought questionable). However, on the actual DAT I got a score of 21, and I ran out of time on every section except the science section. To summarize, I score 17 Biology, 22 Chemistry, 23 Organic Chemistry, 21 Reading, 21 PAT, and 24 Quantitative Reasoning. Overall, I was happy with my score and with the little time and money for studying, I thought this was a great investment.

I would definitely recommend this CD to anyone studying for the DAT. The format and questions themselves are very helpful in preparing you for the actual DAT itself. Being able to take timed practice tests on the computer at home was a good prep for the big test day.

Be aware when purchasing the TOP Score CD, that what you are buying is pretty much 3 practice tests. There is some information on tips for taking the DAT and an outline of what you should know, but it is not a study guide. The CD was good for the most part, but the solutions to questions were terrible, the perceptual ability tests were not as difficult as the PAT on the actual DAT, and I did find multiple mistakes throughout the practice tests. The CD will help you study, but whether it's worth the high price is for you to decide.

I am not able to see my scores!

If you're going to prepare for the DAT, purchasing this software is still a good idea. However, please be aware of certain weaknesses of this software, as there are some: 1) After taking the real DAT, I realized the science sections of this software were more difficult, partly due to the highly specific nature of the questions. 2) I noted that there were an annoying number of incorrect answers on the PAT sections of this test. A portion of the sample questions were clearly variations of those on the official test. Yet, some of these figures were misdrawn, (esp on the top-front-end sections) such that diagrams contradicted each other. Therefore, we're forced to guess between two wrong answers, trying to predict which was the intended correct answer.

These tests set up a realistic expectation for what I might see on the test as opposed to Kaplan's practice exam in the back of their book.

Where do I find my license key?????? I need a step-by-step walk thru because I've been trying to do this for about three hours and cannot find it!!

took my DAT this past week and this did not improve my score. The General Science questions in the tests were much easier than the actual DAT. Perhaps the questions were old. Reading Comp was good
