Customer Reviews

Children and parents will love sharing this book. For the child, it demonstrates how learning and "thinking outside the box" can be fun. Also, I like how it builds on the child's sense of achievement, thereby helping develop greater self-confidence. For the parents, the instructions are clear, enabling them to maximise on what the book has to offer. It's a great opportunity for them to enjoy being involved in their child's development. I have no hesitation in recommending this book.

As a former elementary school teacher, I can truly declare this book to be a valuable aid to children, gifted or not. It is artfully designed to develop their critical thinking and test-taking skills. There is a step-by-step practical approach to the COCAT exam that will greatly inspire young children to give it a try while enjoying themselves and the challenge. The authors devised a very innovative way to motivate children, by creating The Gifted Detective Agency. The children can follow the various puzzles and quizzes and try to find solutions to make themselves a truly gifted detective! Throughout the book, parents are given advice on how to work with their children. The children will, therefore, feel more relaxed having an opportunity to see the test samples and having, above all, their parents by their side when reviewing these worksheets. The colourful illustrations are also definitely a plus for working with young children. I highly recommend this book. It shows a high sense of creativity as well as an astute knowledge of child psychology.

This is an excellent resource. Not only can it be used to help children prepare for tests, but it can also be great for extra practice in general, and even as a holiday activity book. My children enjoyed the logic puzzles and they liked the detective theme in it. The illustrations are appealing, and the children actively wanted to do more puzzles.

It was very useful!

I love these books. I know that my grandson, who is a gifted student, will be able to do all the practice tests. I like that there is an Answer key so that I can refer to it when I correct his work.
