Kim Pezza grew up among orchards and dairy and beef farms having lived most of her life in the Finger Lakes region. She has raised pigs, poultry and game birds, rabbits and goats, and is experienced in growing herbs and vegetables. In her spare time, Kim also teaches workshops in a variety of areas, from art and simple computers for seniors, to making herb butter, oils, and vinegars. She continues to learn new techniques and skills and is currently looking to turn her grandparents' 1800s farm into a small, working homestead.

Thank you!

Loves these kind of books they are great

Backyard Farming: Fruit Trees, Berries and Nuts, is Kim Pezza's latest book in her Backyard Farming series. It is a great overview book to introduce potential backyard grower to growing Fruit trees, berries and nuts. The book combines some scientific details with practical guidance on how to plant and care for your plants. Kim Pezza also includes information on the most common diseases and problems for the respective plant/tree. The book is divided into 8 chapters. The chapters focus on the history of cultivating fruit trees, the basics, propagation, container growing (not everything takes a lot of space), growing: fruits, berries, nuts, and tropical varieties, and finally harvesting and preserving. Rather than just stay at the higher discussion level, Ms Pezza provides useful information on specific types of fruits, nuts and berries. She hits all the main varieties. She explains when to plant, prune, how to care for and finally how to harvest. The book is a great overview book. If you're looking to become a backyard gardener, Backyard Farming: Home Harvesting: Canning and Curing, Pickling and Preserving Vegetables, Fruits and Meats is a great book to start with. Now for the legal language: I won this book as part of the goodreads.com reader giveaway. That said, I'll probably buy more of her Backyard Farming series.
