Potted: Make Your Own Stylish Garden Containers

Synopsis

Hand-made style for outdoor living – Outdoor style often comes at a high price, but it doesn't have to. This lushly designed guide empowers you to create your own show-stopping containers made from everyday materials such as concrete, plastic, metal, terracotta, rope, driftwood, and fabric. The 23 step-by-step projects are affordable, made from accessible materials, and most importantly, gorgeous. They include new spins on old favorites, like the cinderblock garden made popular by design blogs or hanging planters made from enamelware bowls, along with never-before-seen ideas like a chimney flue planter and wall planters made from paint cans. Packed with color photographs and simple instruction, Potted is for anyone who wants to turn an outdoor space into a stylish oasis.

Customer Reviews

What I love most about this book is that Potted's creations are never too

Not precious - but instead modern and innovative and unique. Perfect for my modern home, as well as for my modern-minded interior design clients. First their Los Angeles store - and now their book - have become indispensable to me. Most of their creations involve utilizing renewable, recycled and repurposed materials; and their instruction is very thorough and practical. A very inspiring read - with beautiful photos - that should motivate you to get creating!

I am so excited about this book! I have so many succulents that are still in their original ugly containers because I haven't known exactly what to do with them. And buying planters can be expensive. This book has so many creative ideas for planters made from every day items. The step by step directions seem like they are relatively easy to follow and the results look amazing. I love this book so much that the day I got it I ordered a second copy for a friend. Can't wait to try the tubular PVC planter!!

Love this book. The ideas are so easy and look great. I love their style and creativity. Would definitely suggest this book for any DIY'er who is looking for a little something new! Also, instructions super easy to understand and follow.

What a FUN and Innovative Planter DIY book - All of the projects are easy to create, easy to source and totally affordable. But best of all, they look gorgeous. I strongly encourage anyone who is looking for good container garden ideas or is interested in DIY to get this book. I'm having a lot of fun experimenting.

Great book for modern gardening and outdoor designing. I have not tried any of the ideas but it's fun even just to flip the pages and look at them!

I voluntarily read and reviewed this book. Thanks to NetGalley and Timber Press for the opportunity to read and review *Potted: Make Your Own Stylish Garden Containers* by Annette Goliti Gutierrez! Beautiful photographs and detailed directions make this a must-have book for creating imaginative plant containers. The book isn't bogged down with instructions for planting because the focus is on the pots. A list of needed supplies and clear directions will help beginners create and enjoy beautiful containers that are show off worthy! My favorites are the metal water garden, the cinder block planters and the marbled pots- gorgeous! 5 stars for a wonderfully creative craft book to give your plants a special place.

Was already a fan of the Los Angeles store, so I'm really liking the book so far. The projects are unique and the images make them easy to follow. I like that these get me to pay more attention to things outside of my home since my most of DIY projects tend to keep me stuck inside. I really appreciate that they made an effort to include a lot of projects that use reclaimed and recycled items. Really fun!

This book is amazing! The instructions are so clear and helpful...and so many choices. They help you make containers that beautify your home with YOUR STYLE! I love this book. I have always loved coming into their store: two of the smartest, kindest, talented design professionals around. I highly recommend this book!
