The Garden Journal, Planner And Log Book: Repeat Successes & Learn From Mistakes With Complete Personal Garden Records. 28 Adaptable Year-round Forms, ... (The Garden Journal Log Books) (Volume 1)

Synopsis

The Garden Journal, Planner & Log Book ~ featured at the Philadelphia Flower Show last year. Designed for the gardener who wants to enjoy the benefits of gardening, without the frustrations. FOR THE COST OF ONE SIMPLE GARDEN TOOL, you can OWN THE MOST VALUABLE GARDEN TOOL OF ALL ~ one that will save you money and help you learn from experience. Even more valuable than your favorite garden trowel or spade is a written record of what works in your garden. WHILE GARDENING BOOKS, APPS AND THE INTERNET ARE FULL OF GREAT ADVICE, THEY CAN'T REPLACE PERSONAL EXPERIENCE. Your garden is in your micro-climate, with your soil. Perennials in one part of the country aren't perennials in another. There are simply too many plants and too many variables for anyone to remember from year to year what worked where and what didn't and why. You need to remember WHAT WORKS FOR YOU--IN YOUR GARDEN. Every gardener faces repeat attacks of pests or disease and needs to remember which treatment worked and which did more harm than good. Every gardener has weeded out emerging perennials, forgetting what they planted where. Every gardener needs a memory! Please STOP here and consider your needs: If you want options in your methods of recording, this is the journal for you! If you want a simpler garden journal, please click on the author's name and check out the smaller version, entitled The Garden Diary, Journal & Log Book. It has the same charts and helpful recommendations, but only three basic forms to fill out. This book has twenty-eight forms by comparison. While you don't have to use all the forms, having them available will give you the knowledge needed to become the best gardener possible. See the description below: THE GARDEN JOURNAL, PLANNER & LOG BOOK is a book of garden forms with the flexibility needed to personalize your style of record keeping. With this one book you can track your purchases from store to harvest to propagation. What really makes the difference between a great and a mediocre garden is how well the gardener keeps track of all the information needed to enhance success and avoid repeated failures. GARDENING IS AN ART, BUT IT'S ALSO A SCIENCE. THE GARDEN JOURNAL, PLANNER & LOG BOOK is designed to make record-keeping simple and easy. Every form is designed to include all the pertinent information needed, while minimizing the amount of time required to record that information. Use as many or as few forms as you desire: Individual plant pages with over fifty possible check boxes for each plant, plus space for additional info, photos, drawings, seed packets or tags. Logs for annuals, biennials and perennials, with code, location and date planted. Logs for weather, formulas & recipes, pests and diseases, cultivation and propagation, bloom and harvest times, flowers, bulbs, fruit, vegetables, herbs, vines, shrubs, trees, wildlife sightings and hardscaping. Prune, trim and tidy logs

with guidelines.Planning pages for up to four years. Draw out garden plots for twenty beds on graph paper with notes on the pages opposite.Purchase record logs.Supplier contact list.Keep a diary for all the things you simply must write out using sentences or drawings, because as much as gardening is a science, it is an art above all.YOUR GARDEN WILL LOOK LIKE ART, but you will know thatÂ THE GARDEN JOURNAL, PLANNER & LOG BOOKÂ is the science behind your success.

Customer Reviews

"This is the journal for everyone who desires to grow something or share the love of cultivating. Joy has put together all the ingredients ~ to create the perfect garden because it allows the grower to be the author. Any book that has ~ is going to be used by me daily in my creative growing journey because I live by that in my 18 acres and when I help others with their growing adventure. This is the perfect book to keep out on a coffee table for everyone to enjoy and be inspired to garden."

WHY DOES THE BOOK APPEAR SIDEWAYS? The book binding is hinged on the 11" top edge, to

open like a calendar. Due to the fact that the printing company does not have protocols in place to handle an 11" landscape spine layout, the result is an incorrectly rotated image shown on this product page. I hope you enjoy the forms and use them with abandon! I could have made precise computer-generated lines for the many forms, but the whole idea is that your writing, notes and drawings will become an extension of the underlying artwork, resulting in something useful and beautiful that can be proudly displayed and passed down to the next generation or homeowner. So, scribble away! Contact the author at contact@gardenkitch.com for further information regarding other variations and options. Keep up to date at the gardenkitch.com website.

Finally! This is the perfect solution for my garden documentation. I couldn't tell from the page previews, but I took a chance after disappointment with other planners. This has everything I was looking for and more. There are sections for everything- recording weather, plot design, individual plant pages, logs for types of plants, the diary pages, propagation pages, and even formulas pages (I need to know eg how many gallons of water needed to give a 6 ft diameter raised bed one inch of captured rainwater, how many gallons cistern for 2000 sq ft of beds, etc). I worked out charts for permaculture guilds for our location which I will glue into the book. Otherwise all my other notes will be easy to consolidate here. Unlike other planners, this doesn't read like a how to book- it's just lots of really well designed pages for me to record and organize my notes. Bravo! And thanks a million.

March 20th - I used a blow dryer to soften the glue to separate the pages, trimmed the edges, then made holes with 3 hole punch and placed in a big 3 ring binder. Just need a few more pages for logs and individual plant data -- did not know I had so much data accumulated over the past 3 years and to use divider pages for the major sections. I keep all my seed packets in a 4 inch thick binder too, in 4x6 inch photo pages, so I like having another binder solution.

This is a well thought out journal. It has categories for everything you might possibly want to record. I took mine to the printer and for \$5 they took it apart and spiral bound it. This makes it much easier to use. The price of this journal was so reasonable that I didn't mind paying the extra to have it bound.

I was really excited to receive this book with hopes that I would keep me organized. Unfortunately I don't think that I will be able to utilize it like I thought. I am a fairly new gardener and perhaps as the years pass I will see the need to record all of the plants scientific information, dew points and humidity levels, but at this point I was looking for something a bit more simple to log the basics. This

would be ideal for someone who loves studying plants and grows a wide variety of them. If you are a simple gardener who grows veggies to feed or supplement your family's produce, I'm certain that an organized spiral notebook will suffice.

We just moved to an acreage this past summer and hope to begin a veggie and fruit garden. I have been searching for a helpful and cute way to track our garden...mostly crop rotation and plant data. This will help for sure! It is quite feminine/cute too with little plants and flowers drawn on the pages in the margins. I like this, but if you're searching for a more masculine journal or record book for your garden, this might not be it. It's not a hindrance to the effectiveness of the book, just a stylistic trend worth noting. The other thing I like is the presence of the page categories on the open edge of the book. This helps you quickly find the section you need be it weather log, garden plot, various plant logs, etc.. The author gives permission to take part and copy her pages (as long as you do not mass produce with intent to sell or give away), to truly make your own journal. I will likely do this as I will require more pages than what is available in some sections. It has a page of the U.S. Agricultural Zone Map, charts and tables with measurement conversions, and it has a page devoting to tree pruning (instructions and images) as well as soil, worm and drainage tests that you can easily do on your own. There's a lot of space to fill in if you choose to, or you could probably scratch out and rename some sections to meet your needs, but the base level of this book is fantastic!

I am taking a Master Gardener class thru the county cooperative extension - - these pages are great for keeping all the information about sources for seeds, plants, dates for planting, pest, weather and many other records I will be so glad I can look back on. Love it.

If I could give this book 10 stars, I would! It is chock full of pages to help you organize your garden details - from planning, to plant purchases, to growing. And there are plenty of each type of page to be useful for a long time. I received it yesterday and last night I was already sketching and planning a new flower bed for this season. I'm also a bit of a book snob and I even love the paper used and the simple graphics. I can tell this will be a useful resource for me for many years. In fact, I am a Master Gardener and I love this book so much, I plan on sharing it with my fellow Master Gardeners at our next meeting.

I love the forms but I wish top margins was deeper so that it could be put in notebook without losing so much. Or that you could be a downloadable version so that it could be adapted to the individual

gardeners needs.

Wonderful log book, everything we need
