Customer Reviews

I sucked at mechanical aptitude and math. I bought the book and flash cards and now I don't suck at either. If you have the book you pretty much have the flash cards already. When ever I'm learning anything I need flash cards to help me so I decided to buy this. I tried making my own, but these had pictures and great explanations. I give the product a 5/5 because its exactly what i expected I was buying and the cards really did help. If you need help with math or mechanical aptitude for fire tests buy the book for and maybe the flash cards.FYI - the box is not totally full of cards, the 300 or so cards only take up 1/3 the space in the box.

This box has 300 flash cards with Q&A. It also explains the answers too. It's great for studing anywhere since there small sized like home or work. You could also turn it into a game with friends. Thanks a lot!

very pleased , would recommend

Excellent
