The Ultimate Patent Bar Study Guide: Pass The Patent Bar Exam With Ease

Synopsis

Comprehensive study guide explaining everything currently tested on the patent bar exam in crystal clear detail. Over 300 pages of information keyed to the Manual of Patent Examining Procedure (MPEP) Complimentary access to our extensive question database, which contains over 1,200 actual past exam questions with detailed answers. That's right, over one thousand questions actually appearing on previous administrations of the patent bar exam! As a special bonus, you will also receive a list of recently tested topics and questions that are frequently repeated on the patent bar exam. You will receive anywhere from 20 to 50 or more questions on your exam that come directly from our list of questions. No other guide offers this! Updated for the latest version of the MPEP and the America Invents Act. The most up-to-date study guide available for the patent bar exam.

Customer Reviews

John Watts, Esq. is a patent attorney registered to practice before the United States Patent & Trademark Office. With over twenty years of legal experience, Mr. Watts has been helping people pass the patent bar exam for over a decade.

This book is a good guide for getting an overview of different sections of the MPEP and providing a layman's intro to what different concepts tested on the Patent bar are. I especially liked the book's explanation about the PCT app examination process, because it presented everything in

chronological order nicely. There is also a very useful section in the end of the book that discusses answers to questions that have appeared on the exam. However, one thing to keep in mind as you're going through the book is that all of the topics up until the penultimate chapter are pre-AIA laws, so if you are just starting to study for the patent bar, I would first go to the back of the book and read the "AIA changes" chapter before diving in. Otherwise, you spend time studying material about concepts that are no longer important for the exam, such as interference hearings and "reduction to practice," and you get used to thinking about applicant's rights in terms of a "first-to-invent" rather than a "first-to-file" system.

Poor organization throughout the book make it difficult to understand concepts. Typos throughout as well. The practice questions in the back of the book attempt a summary of the question only and makes using the practice questions difficult. I read this book twice before the Patent Bar and very little of the material covered was tested. I also left this book at the testing center.

;))

This is a great reference book. You will not pass the Patent Bar using this book and nothing else. This book should only be used as a quick reference guide. Definitely worth buying.

I read through this entire book and really digested the material. It is a good overview but frankly I wouldn't use it as a way to study for the patent bar when I have to re-take it.

this book jumps into the laws after laws without providing any introductory or even structure. its law after law. no real organization. reading it one by one does not help that much cause there are so much stuff being missed in explanations. I would love to hear more about the people who passed the exam using only this source cause it would be very enlightening.there are some sample questions and notes in text about common questions which is nice. all in all its a hard read. i'll update you if i went deeper in.

This book provides a base for taking the patent bar, nothing more. It goes nowhere near some of the topicsgood for starting out though, gives you the fundamentals and then some. Highly recommend going through the MPEP and maybe PLI if you want to spring for it.UPDATED 9/10Got a 61/100 on my first attempt.

While this book alone is probably insufficient to prepare yourself for the patent bar, it is well-worth the cost and time to read it. Read this book before you even pick up the MPEP or a practice test. Again, I didn't use this book alone, but this was by far the most valuable study resource I had to take the patent bar. And I passed on the first try.
