Customer Reviews

To help parents chart a course for their children based on traditional values--self-reliance, family, hard work, justice, the pursuit of knowledge and of brotherhood--Edelman, founder and president of the Childrens Defense Fund, effectively recounts her experience and vision in essays variously addressed to her own children, to all children and to parents. Edelman, who grew up in the segregated South and was the first black woman admitted to the Mississippi bar, recalls the community of her childhood where one child's accomplishments gave joy to all, where neighbors took care of each other and where parents instilled a sense of responsibility in their offspring. In the introduction the author's son Jonah examines the value and pressure of being raised by an African American mother and a Jewish father. 40,000 first printing; \$40,000 ad/promo; author tour.

YA-- Edelman passes on the values of hard work, service, responsibility, and faith that her parents not only preached, but also lived. Her 25 lessons for life eloquently distill the essence of her rich heritage. Intended for her sons as they approach adulthood, the book is uniquely applicable to all

races and creeds. The author's style is warm, personal, uplifting, and easy to read. The book has several uses: for personal searching for answers, guidance, or reassurance; for a curriculum unit on child-care; for a book discussion group. It should be required reading by anyone in a position to influence or change the future of America's most valuable resource, its children.- Judy Sokoll, Fairfax County Public Library, VA

I first read this book some 15 years ago when it was first published. Every now and then you read something so amazing that you want to share it with the world and this was one of those books. It became "that book" I gave copies to all of my friends who were parents. I was recently discussing this book it brought back so many memories, I decided for Christmas 2012 it would be "that book" once again. I have also encouraged my parent group the WBAAPA.org to have this as part of our discussion group. The life lessons cross every social and economic background, great lessons and good old common sense. This message is as true today, as it was when first published. Get one for yourself, your neighbor and any parent young or old to help them be reminded of some basic values that help make us good and decent people. This is a must read and should be standard for every parenting group book club and other groups looking to enlighten our society.VMACK

This is a great book to give to graduating students. Very inspirational.

Great product. Reasonable price

Excellent read! Great to use as a daily tool raising your children especially a son. Thank you Ms Edelman

Beautifully written and fabulous outlook for a life to be well lived realistic, pure values

A MUST READ FOR THOSE WITH SONS! Even though many of the lessons told by Marian Edelman are ones we have learned, this book is a reminder of some of the basic principles that we should teach our children. It is wonderful to see her journey in life, and how her experiences have impacted her contributions to society.

Inspirational

great source for meaningful things that matter
