Alchemy In The Rain Forest: Politics, Ecology, And Resilience In A New Guinea Mining Area (New Ecologies For The Twenty-First Century)

Synopsis

In *Alchemy in the Rain Forest* Jerry K. Jacka explores how the indigenous population of Papua New Guinea's highlands struggle to create meaningful lives in the midst of extreme social conflict and environmental degradation. Drawing on theories of political ecology, place, and ontology and using ethnographic, environmental, and historical data, Jacka presents a multilayered examination of the impacts large-scale commercial gold mining in the region has had on ecology and social relations. Despite the deadly interclan violence and widespread pollution brought on by mining, the uneven distribution of its financial benefits has led many Porgerans to call for further development. This desire for increased mining, Jacka points out, counters popular portrayals of indigenous people as innate conservationists who defend the environment from international neoliberal development. Jacka's examination of the ways Porgerans search for common ground between capitalist and indigenous ways of knowing and being points to the complexity and interconnectedness of land, indigenous knowledge, and the global economy in Porgera and beyond.

Book Information

Series: New Ecologies for the Twenty-First Century

Paperback: 296 pages

Publisher: Duke University Press Books (November 13, 2015)

Language: English

ISBN-10: 082236011X

ISBN-13: 978-0822360117

Product Dimensions: 8.9 x 6 x 0.6 inches

Shipping Weight: 12.6 ounces (View shipping rates and policies)

Customer Reviews

"In this field-changing analysis, Jerry K. Jacka shows us a world that is complex and changing, and he takes topics readers think they know and treats them in new and stimulating ways. *Alchemy in the Rain Forest* is a brilliant examination of ontological adaptation and change over the course of the history of Papua New Guinea's highlands." (Paige West, author of *From Modern Production to Imagined Primitive: The Social World of Coffee from Papua New Guinea*) "In this

unique and nuanced study in highland Papua New Guinea, Jerry K. Jacka shows how royalty and compensatory payments from a multi-national gold mining company percolate through the local kinship system, transform the socioecology, and exacerbate inter-clan violence in a truly horrific way. In place of the idealized relations of neoliberal economics, Jacka posits an 'alchemy' in one of the most revealing and disturbing accounts ever written of industrial resource extraction in the Global South. Sure to become a classic." (Michael R. Dove, Yale University)"In sum, this book is a valuable addition to the specialist literature on mining and social change in Melanesia, but also written in a clear style that will be of great use in the classroom. I recommend Jacka's accessible, straightforward ethnography to all readers." (Alex Golub Anthropology Book Forum 2016-06-01)"[Alchemy in the Rain Forest] is an important contribution to environmental anthropology and political ecology. Jacka ultimately argues that the mine's promises of development are as illusive as the alchemists' quest for gold. What is unique about the book is not that ultimate assessment, but its exploration of the ways in which people who bear the greatest social and environmental harms of large-scale mining understand and navigate those changes." (Jessica M. Smith Journal of Anthropological Research 2017-01-31)

Jerry K. Jacka is Assistant Professor of Anthropology at the University of Colorado, Boulder.
