Chili Hot GMAT: 200 All-Star Problems To Get You A High Score On Your GMAT Exam

Synopsis

Winner, USA Books News Best Book Awards
CHILI HOT GMAT is based on a simple but powerful observation: Test-takers who score high on the GMAT exam do so primarily by understanding how to solve a finite number of the most important kinds of problems that appear on the GMAT. What are these important types of problems? The answer to this question is the basis of this book. In addition to comprehensive coverage of all six major problem types including Problem Solving, Data Sufficiency, Sentence Correction, Critical Reasoning, Reading Comprehension, and Analytical Writing, this manual also provides in-depth analysis of 194 multiple-choice problems and 6 essay questions. Each hand-selected problem comes with a classification, snapshot, and chili rating. Classification serves to identify each problem according to category or sub-category. Snapshot highlights why that particular problem was chosen, including the underlying problem-solving principle or strategic approach. Chili rating helps candidates gauge the estimated difficulty level of a given problem. A single chili indicates that the difficulty level of a given problem is "mild" (500 to 600 difficulty level), two chilies spell "hot" (600 to 700 difficulty level), and three chilies signal "very hot" (700 or above difficulty level). By studying problems of varying difficulty, candidates will learn not only to maintain discipline on easy but tricky problems but also to exercise flexibility when deciding on multiple approaches and time-saving shortcuts for use in tackling harder, more involved problems.

Customer Reviews

"Finally, a book that helps you master those learning skills that are critical to success on the GMAT."

--Linda B. Meehan Assistant Dean & Executive Director of Admissions, Columbia Business

School"Chili Hot GMAT has been invaluable in getting me fully prepared for the GMAT in less than a month and helping me to achieve a substantial 100-point improvement over my previous test result. Specifically, the 'work smart' approach makes it easy for the uninitiated or time-pressured test-taker to get up to speed quickly in all areas, from analytical writing to high school geometry. I highly recommend this book." ----Geoffrey Chen, former consultant, McKinsey & Co., INSEAD graduate

Whether you're a candidate already enrolled in a test-prep course or are undertaking self-study, this book will serve as a rigorous skill-building study guide to help you conquer the math, verbal, and writing sections of the exam.

Chili Hot GMAT was my most helpful resource for the GMAT prep. It is especially well designed for those with limited time to prepare for the test. The classifications by problem typology and by level of difficulty were particularly useful features. As an international applicant, I found the Analytical Writing section especially well designed and very helpful with plenty of tips and applicable ideas. I would definitely recommend this book to any GMAT taker, especially for international students." Tuck 2010 International MBA Student.
