Susanna Wallis is a member of the International Feltmakers' Association and craft designer whose work has appeared in "Country Living" magazine.

It DID say "Beginner's Guide" in the title. But... the projects presented here are nothing I'd ever consider wasting materials on. Most looked like a child could do it (or did it) - and some even looked like they were simply cut out of cheap ready-made felt and glued together. Now what is the point of buying roving, needles, and a felting mat if it looks like a 29 cent craft when you're done? And does anyone really want a full set of fuzzy tea cups and saucers? There was no blending of colors or fine detail; in fact, in the case of the doll it was left faceless and shapeless which was kind of creepy.

The worst thing I saw was a photo demonstration of a needle technique that would almost certainly require the use of band-aids later! Dyeing the felt with my own blood is not something I'd go for. This is a 64 page booklet on very good paper with very good color photography of very poor projects - really not worth the price even discounted.

I have a group of friends who get together every few months do craft... often trying something new. I got this book and a bunch of supplies and we had a terrific time felting. The instructions worked well and the pictures were very clear. Good introduction to felting and a wide variety of project ideas - everyone in my group was happy with their project.

Very helpful for the beginner felter. Lots of good hints on how to form shapes. Highly recommended for all beginners.

Bought this book to learn more about needle felting. It has some really good project ideas. I will be using it for ideas for Christmas.

What a great starter book of instructions! Lots of pictures and good directions for trying this new craft. Plan to try several projects.

This is a very self explaining book shows details & written perfect for beginners all so Buy it & enjoy, Thank's Barbara

I would recommend this book to anyone who like to felt. I read this book and then I made a few projects for a few of my girlfriends as gifts. They just loved them because they were unique.

Love this book! I found a felting kit on a clearance rack and fell in love with this craft in seconds! I decided to buy this book after I finished that project. It answered questions I had and gave me simple projects to do and build my skill level. I'm looking forward to making the tea set but I want to work up to that. I can tell you the book advises you to buy those finger tip protectors.....do it! Or buy a box of band aids
