If you are level 20 or higher, you probably find the only one or two things in this book is useful. Mass evolve is one, but you can find the info easily on internet. The book should go into more details as to which pokemon to use against which to attack a gym effectively.

My son loves this guide. He is not one to pick up a book and start reading, but he did with this book.

Favorite pokemon is gengar, in pokemon go though it's lapras (my buddy pick). I have found a few locations around my town that spawn specifically rarer pokemon then other stops. And it's fairly common to find something there throughout the day, so the spawn may have set locations to spawn

rarer pokemon then other locations?
