George Cuhaj is an experienced and accomplished numismatist and researcher. George, a former cataloger for both Stack's Auction House in New York and the American Numismatic Society, and also serves as editor of the Standard Catalog of World Paper Money series. Thomas Michael has performed in-depth price analysis on nearly 90 world and U.C. coin catalogs for the KP numismatic book line. He traveled to Berlin, Germany, in January 2010 to connect his network of collectors and dealers and to create the most accurate database of world coin market values.

Gee folks - For the best prices most all current values, you must try these used catalogs! They are clean like new at phenomenal savings. Sometimes even the profits are recycled back into the libraries where they had originated. If you are avid or a novice they are of course easy and efficient to use. What a relief it is to know and actually taste the knowledge. Attribute your coins dates and inscriptions by sight or comparisons. Search the price range and take your time to be sure you find if it suits your needs and then it gets better. Thank you and enjoy your time - Raymond.

The 'Standard Catalog' series is the foundation of coin identification and values for coinage from 1600 to the present. It's not perfect, but it is the best there is for now. Even though these publications are also available on compact disk, many collectors, myself included, find it easier to the book, even if it is quite massive! The series are usually updated every year, but even the older editions are very helpful, especially since they are heavily discounted. Needless to say, the values are almost always out of date, but do give you an idea of comparative scarcity.

needed this to complete my coin reference books. Very comprehensive with actual size photos of all the coins. A must have book for the world coin collector.

Lots of priceless information cheap!

Book is VERY large. Make sure you've got shelf space!
