Discerning Truth

Synopsis

Every day Christians are faced with an increasing onslaught of criticism from evolutionists for their belief in God and His glorious creation. What do you say when your faith is challenged by those claiming to speak in the name of science or reason? Discerning Truth provides a practical and engaging resource on the use of logic in this critical debate. Filled with anecdotes from both creative examples and real-life illustrations that help clarify logical issues in apologetics. Become skilled at distinguishing sound arguments from emotionally-charged rhetoric. Helps any believer refute evolutionary perspectives. Lisle believes that creationists need to be able to recognize and refute evolutionist arguments, and to do so in a way that both honors God and lines up with the truth of His Word (Eph. 5:1). The role of logic, the study of correct reasoning, is becoming a vanishing skill in our society. Yet it is a vital tool in assisting Christians in assessing the weaknesses in evolutionary thought. Here is the clear and concise guide for every believer in defending your faith in the face of adversity.

Book Information

Paperback: 144 pages

Publisher: Master Books (July 26, 2010)

Language: English

ISBN-10: 0890515948

ISBN-13: 978-0890515945

Product Dimensions: 6.3 x 0.4 x 9 inches

Customer Reviews

Dr. Jason Lisle is the Director of Research and a featured speaker and writer for the Institute for Creation Research. He previously served as the Planetarium Director for the Creation Museum in KY. Dr. Lisle has also authored a number of books which include: Taking Back Astronomy, The Ultimate Proof of Creation, Old-Earth Creationism on Trial, and The Stargazer's Guide to the Night Sky. Dr. Jason Lisle holds bachelor of science degrees in physics and astronomy from Ohio Wesleyan University, as well as a master's and PhD in Astro-physics from the University of

Colorado in Boulder. As a creation scientist Dr. Lisle effectively communicates a broad range of topics from in-depth presentations of distant starlight, Einstein's relativity, and problems with the big bang to topics from astronomy and general science to apologetics and dinosaurs.

Jason Lisle is a great teacher, and he uses presuppositional apologetics. This book answers logical fallacies that evolutionists will often throw at creationists. He dissects and dismantles nonsense with an engaging style.

A book for those that are truly seeking the truth and are willing to face the truth without shying away

Every thing by Dr. Lisle is a must have. Check out his new web site. Biblical Science Institute.

I like this book. It gives a nice introduction to logic, and especially to logical fallacies that one encounters when defending our true origins to those who reject the historical and scientific evidence. If you already have the author's pocket guide to logic, then be aware that this larger book is essentially a more fleshed out version of the smaller one. I read the smaller book first, and this one didn't really add a whole lot that was new. There are also 40 some pages of examples and explanations that are presented in numbered-paragraph format. It's not the sort of material one just sits down and reads through. I skipped by it. Some might find it helpful though. There's also a very nice appendix at the end giving all the formal names of the various fallacies. The list includes the Latin names, and I like having that list as a reference.

For a friend and she is very pleased!!!! Thank you, JudieMae

Simple and to the point. Numerous examples of fallacies listed, shockingly some I've used myself!

Very important to not lose sight of logic in any debate. Emotionalism doesn't cut it, irrational answers don't cut it, only ideas that are logical, truly logical, based on all the laws of logic are valid. Logic only stems from a Biblical world view. The challenge to anyone is to prove this statement wrong. Or surrender!

The book lays out the logical method to consider facts and come to a rational decision about truth or error. This type of logic has been removed from the education system and we all are poorer for the

loss of critical reasoning skills in the general populace. You may or may not like Lisle's conclusions but the method is very hard to reject.
