Nancy Curry is a nationally known rubber stamp artist who has taught stamping workshops throughout the USA. Her work has been published in many of the top craft magazines.

Ms. Curry has produced a book that is packed with imaginative, beautiful techniques that should inspire paper crafters and artists of all genres to venture into new territory. It was tempting to put the

book down after each section and run to my studio to try out a new texture technique! The photography is top-flight, the directions are well-written, and there's no doubt Ms. Curry has produced a winner for artists of all stripes. If she has more "tricks" up her sleeve and writes another book, I will definitely make it a part of my library as well.

This is an excellent book and has inspired me to do things for my own textured pieces. I have no qualms in recommending this book. The different ways of making stamps, either in clay or in string stamps which are hand made, but a myriad of different ideas. I especially like the effect she does with the Webbing Spray. As a book cover designer and book maker I found this book a joy. This is definitely a need and a want.

I think I'm partial, but I still love it. I'm out of all of my copies so I ordered here for a friend.

Full of information. I loved it.

I had waited months for this book to finally be released! And it was well worth the wait! Nancy has a great eye for color and balance of textures and color. You can see by flipping through this book that there are many wonderful and original ideas for background techniques as well as practical card ideas that are unique and sophisticated. It is rare for me to find a book that has so many ideas I want to try! This book will be enjoyed by both the experienced stamper as well as the beginner; whether collage artist or scrapper! There is something in here for everyone! I love it!

This is a must-have book for serious stamper's. Nancy's techniques are very detailed and creative. You'll be surprised how many supplies you have on hand and around the house when trying her techniques. I've read the book twice and I've tried all her techniques. Believe me you will not be able to put this book down. Definitely a stamper's bible!!

This is not merely a picture book, nor is it a long-winded teaching book. The teaching is there, done via a series of projects which involve the reader in using the techniques. I love the clear way the content is provided. And I like it that Ms Curry gives her preferences, and reasons, for specific products. Altogether a great book.

I really liked this book it will be in my collection. There were several techniques that I knew but

seeing someone else do this was still interesting. It is great for beginners as well because it explains things clearly.
