Numbers 1-30 Write & Wipe Flash Cards (Kumon Flash Cards)

Synopsis

These extra large and thick write & wipe flash cards allow children to count abstract objects (dots) and identify them with a numeral. Using a dry-erase marker and following the strokes in order as they are outlined on the card, children will learn not only how to count, but also how to write the numbers 1-30.

Customer Reviews

I just wanted to put down a 5-star review but wants more out of me. So you're going to get it. Love them. Have victimized others with appropriately aged childrens with gifts of them. One thing I don't really like is that only one side has the wipeable finish. All the other reviews might say this but I didn't read them. Because I'm a goddern cowboy--that's why. Oh, and that Harvard thing is bull. But seriously, they're pretty cool and my kid likes them.

PRO: This product helps with number recognition, number order, counting dots correctly, and writing numbers. CON: The front of the card has only one number to trace & then on the back are dots to count. I think this item would be more affective, if there were more spaces for the child to trace each number. I recommend Brain Quest Write & Erase Set: Numbers instead if you want your child to have more practice writing & tracing the same number at a time.

We love the set but there are two things I wish were different - the cards have two sides. Only one of them can be wiped with the marker. I wish both sides could be wiped as my son is very creative and there is a lot of "artistic designs" on the side with dots now. I wish it came with more than one pen - for one, he has hard time switching the same pen between writing and wiping - if it has two, he could just write with one hand and wipe with another. The second is the pen dries out very quick. Now I am looking for the replacement pen.

Amazing I would recommend for any mother

Great and fun learning tool

Excellent for my kid

Very helpful for kids, recommended

The cards are so large that I do not believe they will actually help my daughter learn to write the numbers, but they are good practice for holding a pencil and tracing. She has little hands so right now the concern is improving her fine motor skills so this product is perfect. My only complaint is the pen that comes with the cards does not come out of clothing.
