Surviving Your Dissertation: A Comprehensive Guide To Content And Process

Synopsis

In the fully updated Fourth Edition of their best-selling guide, *Surviving Your Dissertation*, Kjell Erik Rudestam and Rae R. Newton answer questions concerning every stage of the dissertation process, including selecting a suitable topic, conducting a literature review, developing a research question, understanding the role of theory, selecting an appropriate methodology and research design, analyzing data, and interpreting and presenting results. In addition, this must-have guide covers topics that other dissertation guides often miss, such as the many types of quantitative and qualitative research models available, the principles of good scholarly writing, how to work with committees, how to meet IRB and ethical standards, and how to overcome task and emotional blocks. With plenty of current examples, the new edition features an expanded discussion of online research, data collection and analysis, and the use of data archives, as well as expanded coverage of qualitative methods and added information on mixed methods.

Customer Reviews

"This text provides a broad coverage, focused approach for dissertation, balanced approach between quantitative and qualitative designs, and excellent examples."--Udaya R. Wagle, Western Michigan University

"The title is wonderful and attention getting. It's practical and consistent with the title in terms of compliance with requirements while seeking the path of least resistance toward completion of a quality product."--Bernie Kerr, Central Michigan University

"The text is well organized....It includes chapters on the presentation of both quantitative and qualitative results which are particularly welcome in PhD programs that value paradigmatic diversity and do not expect students to conform to the assumptions of a single paradigm such as positivism."--Karin Klenke, Leadership Development Institute (LDI) International
