Lab Manual For General, Organic & Biochemistry

Synopsis

The seventh edition, by Charles H. Henrickson, Larry C. Byrd, and Norman W. Hunter of Western Kentucky University, offers clear and concise laboratory experiments to reinforce students' understanding of concepts. Pre-laboratory exercises, questions, and report sheets are coordinated with each experiment to ensure active student involvement and comprehension. An updated student tutorial on graphing with Excel has been added to this edition. Laboratory Instructor's Manual: Written by Charles H. Henrickson, Larry C. Byrd, and Norman W. Hunter of Western Kentucky University, this helpful guide contains hints that the authors have learned over the years to ensure students' success in the laboratory. This Resource Guide is available through the Connect Chemistry website for this text.

I ordered this manual thinking I could photocopy the used version of labs I needed but the pages

were missing. I basically bought a manual with no report sheets. Would never buy again.

Excellent compliment to the text book. For the end of chapter problems, this guide explains how to arrive at the answer. This was very helpful since my chemistry professor didn't like to explain anything. The guide breaks down concepts in the book that I found very confusing. The textbook is very wordy. The study guide does a good job summarizing and explaining topics in easy to understand language.

I was a little hesitant to buy but it was worth it, great condition and saved me a lot of money

I bunch of missing pages, labs, prelabs, instructions. What a rip off.

This book was required for my human chem lab class and the experiments last you through 2 semester courses depending on your school. Saved a lot as it was priced \$30 more at my school bookstore. No markings or ripped out pages at all :)

Easy to follow instructions for the labs

I ordered the book and it came to me with missing labs. A waste of 60\$. Returning... should have used chegg.

Several of the pages were torn out
