Cost Estimating Manual For Pipelines And Marine Structures (Estimator's Man-Hour Library)

Synopsis

From the Book - Preface: This manual has been compiled to provide time frames, labor crews and equipment spreads to assist the estimator in capsulizing an estimate for the installation of cross-country pipelines, marshland pipelines, nearshore and surf zone pipelines, submerged pipelines, wharfs, jetties, dock facilities, single-point mooring terminals, offshore drilling and production platforms and equipment and appurtenances installed thereon. The time frames and labor and equipment spreads which appear throughout this manual are the result of many time and method studies conducted under varied conditions and at locations throughout the world; these time frames and labor and equipment spreads reflect a complete, unbiased view of all operations involved. When one is engaged in compiling an estimate from any information furnished by others, as is the case with this manual, he should view it in an objective light, giving due consideration to the nature of the project at hand and evaluating all items that may affect the productivity of labor and all other elements involved.

Book Information

Paperback: 336 pages

Publisher: Gulf Professional Publishing; 1 edition (January 15, 1977)

Language: English

ISBN-10: 0872011577

ISBN-13: 978-0872011571

Customer Reviews

John S. Page has wide experience in cost and labor estimating, having worked for some of the largest construction firms in the world. He has made and assembled numerous types of estimates including lump-sum, hard-priced, and scope, and has conducted many time and method studies in the field and in fabricating shops. Mr. Page has a B.S. in civil engineering from the University of

Arkansas and received the Award of Merit from the American Association of Cost Engineers in recognition of outstanding service and cost engineering.

I have referred to Page's Piping Man-hour Manual for some years and found it to be a good reference. I was surprised how much information was in the pipelines and marine structures book. It is very comprehensive.

Very helpful and a must for a pipe contractor.
