## Customer Reviews

What's not to love? Your dinosaur-loving and learning-to-count kid will thank you. We used the double-strength Elmer's glue stick and it held quickly enough for a 5 year old. The perforations are very well done.

The dinosaurs are really beautiful. The dinosaur parts pop out of the book easily. The directions are

easy to follow and the assembly takes time but is not difficult. I also bought the Paper Craft Crazy Critters book. I'd recommend both and I think adults would enjoy as much as kids.

I like the idea of this book but they're really very advanced and difficult to put together. Too advanced for a 3.5 year old, 5.5 year old, and their grandfather! I think Grampa was most disappointed. That aside, they love looking through the book and don't seem to care that they're not putting the dinosaurs together!

My 6-year-old was able to make most of these by himself - lots of fun and a great challenge! If you like this kind of thing, I'd also recommend Papertoy Monsters - my son loves it so much we've actually bought three copies!

Really nice, kids love it!

This book was hours of fun for my kids. My 9 and 7 year old were both happy to make these paper critters together and proud to display them all over the house when finished. It fostered their creativity.
