The Age of Reason represents the results of years of study and reflection by Thomas Paine on the place of religion in society. Paine wrote: "Of all the tyrannies that affect mankind, tyranny in religion is the worst; every other species of tyranny is limited to the world we live in; but this attempts to stride beyond the grave, and seeks to pursue us into eternity." The cool rationale of Paine's Age of Reason influenced religious thinking throughout the world; and its pervasive influence continues to the present day. Common Sense by Thomas Paine is also available from Amereon.

Thomas Paine (February 9, 1737 June 8, 1809) was an English-American political activist, author, political theorist and revolutionary. As the author of two highly influential pamphlets at the start of the American Revolution, he inspired the Patriots in 1776 to declare independence from Britain. His ideas reflected Enlightenment-era rhetoric of transnational human rights. He has been called "a corset maker by trade, a journalist by profession, and a propagandist by inclination". Born in Thetford, England, in the county of Norfolk, Paine emigrated to the British American colonies in 1774 with the help of Benjamin Franklin, arriving just in time to participate in the American Revolution. His principal contributions were the powerful, widely read pamphlet Common Sense (1776), the all-time best-selling American book that advocated colonial America's independence.
from the Kingdom of Great Britain, and The American Crisis (1776–83), a pro-revolutionary pamphlet series. Common Sense was so influential that John Adams said, "Without the pen of the author of Common Sense, the sword of Washington would have been raised in vain." Paine lived in France for most of the 1790s, becoming deeply involved in the French Revolution. He wrote the Rights of Man (1791), in part a defence of the French Revolution against its critics. His attacks on British writer Edmund Burke led to a trial and conviction in absentia in 1792 for the crime of seditious libel. In 1792, despite not being able to speak French, he was elected to the French National Convention. The Girondists regarded him as an ally. Consequently, the Montagnards, especially Robespierre, regarded him as an enemy. In December 1793, he was arrested and imprisoned in Paris, then released in 1794. He became notorious because of his pamphlet The Age of Reason (1793–94), in which he advocated deism, promoted reason and freethinking, and argued against institutionalized religion in general and Christian doctrine in particular. He also wrote the pamphlet Agrarian Justice (1795), discussing the origins of property, and introduced the concept of a guaranteed minimum income. In 1802, he returned to America where he died on June 8, 1809. Only six people attended his funeral as he had been ostracized for his ridicule of Christianity.
